TEFLON® Industrial coatings: ETFE range

ETFE powders produce a very tough and durable finish having excellent chemical and corrosion resistance at temperatures up to 150°C. Film thicknesses above 750 µm are easily achieved.

Product references			Curing temperature °C	Max in-use temperature °C	Colour (see below)	Product properties P / W	Food contact
primers	midcoats	topcoats					
699N-129			100-110	150	black	W	No**
	532-6314		305	150	green	P	No**
	532-6118		295-300	150	pearly	P	No**
	532-6200		280	150	white	P	No**
		532-6310	305	150	clear	P	No**
		532-6210	280	150	clear	P	No**
699N-129			100	150	black	W	No
	699N-213		290-300	150	black	W	No
699N-129			100-110	150	black	W	No
	699-205		300-310	150	pearly	W	No
		532-6310	305	150	clear	P	No

The final colour is the colour of the primer or the intermediate.

** : these products are FDA approved up to 120°C (only in the USA)

699N-213 is a new ETFE grade for dipping process
