

## Weatherstrip Core Products

Acheson's TW-500 series of N-methylpyrrolidone-free coatings allows compliance to upcoming European Union restrictions of NMP content.

High Performance Waterbased Weatherstrip Coatings		
Product	Color	Applications
Emralon® TW-500	Black	Industry standard for high abrasion and noise suppression requirements. Very user friendly. NMP-free.
Emralon TW-501	Black	High abrasion resistant coating for glassrun applications where muddy water abrasion resistance is required. NMP-free.
Emralon TW-502	Black	Industry standard for high abrasion and noise suppression requirements without the need for substrate pretreatment in most cases. Well suited for TPV substrates. NMP-free.
Emralon TW-503	Clear	Clear coating with high abrasion resistance and noise suppression properties. Very user friendly. NMP-free. NPM-free.
Emralon TW-504	Black	Industry standard for high abrasion resistance properties with good noise suppression properties. NMP-free. NMP-free.
Emralon TW-511	Black	One-part product with high performance, glossy black coating for general purpose protection. NMP-free.
Emralon TW-512	Black	One-part product with high performance, mat black coating for general purpose protection. NMP-free.
Emralon TW-520	Black	Coarse particulate coating that is very capable of suppressing squeak and itch for aggressive seal movement, such as folding car top seals. NMP-free.
Emralon TW-067	Black	High performance, high abrasion resistance coating with extremely good UV resistance.
Emralon TW-067G	Black	Fine particulate version of Emralon TW-067, providing added squeak and itch suppression with high UV resistance. Low gloss.
Emralon TW-068	Black	Highly UV resistant appearance coating where functionality is not required.
Emralon TW-070	Black	Very smooth, lower gloss coating with excellent abrasion resistance for glassruns and doorseals. Special, soft-touch appearance coating.
